

On the Great Lakes, the more weather information the better. Satellite radio has now become a SAFETY ISSUE!! On a Homeland Security level, the more ways to communicate with the public the better. Satellite radio is a superior product. The public airwaves are AWFUL, for the most part. I receive a cleaner/purer radio signal via satellite, and all the IDIOTIC COMMERCIALS AND DJ'S are absent.

Please do not hamper the Satellite Radio Industry. We(the public) are receiving a great service. Personally, I would pay twice as much for my subscription.
